## My New Pet

I got a new pet last week. It is a little cat. I named her Mia. Mia has soft white fur and big blue eyes. Every morning, Mia jumps on my bed to wake me up. We play with a small red ball in the yard. She chases it when I throw it. At lunchtime, I give her a bowl of milk. She purrs loudly when she drinks. Mia loves to sit by the window and watch the birds. At night, she sleeps at the foot of my bed. I am happy to have Mia as my pet.

## Grade 2 Reading Comprehension Worksheet

### The Ant and the Grasshopper

By Aesop

Read the story below.

In a field one summer's day a Grasshopper was hopping and singing. An Ant passed by, bearing along with great toil an ear of corn. "Why not come and chat with me," said the Grasshopper. "I am helping to lay up food for the winter," said the Ant. "Why bother about winter?"

said the Grasshopper. But the Ant went on its way and continued its toil. When the winter came the Grasshopper had no food and found itself dying of hunger while it saw the ants distributing every day corn and grain from the stores they had collected in the summer. Then the Grasshopper knew: It is best to prepare for days of need.

RF.3.4: Read with  
support complet

Great White Sharks live in cool water all over the world. They are independent.

After birth, they swim away from their mother right away. Baby sharks are called pups. Pups must be careful. They can be

prey for other sharks. The pups eat fish and birds. Adult sharks eat seals and

whales. They prefer to eat marine life that is close to the water's surface. They hunt in many ways. Sharks can be very tricky.

First, they swim underneath their prey.

Then they swim up to the surface quickly.

They catch their prey, and dive back into the water. Other times, they attack their

prey in the water and drag them to the bottom until they stop struggling. To eat

their meal, they tear off chunks of its flesh and swallow it whole.
